AOUN MD

Cloud & DevOps Engineer

Malegaon, Maharashtra, India | +91 9545704312 | aounmd74@gmail.com

Portfolio: aoun62336.github.io | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Cloud and DevOps engineer with internship experience in DevOps, software development, and cloud support. Built and verified CI/CD pipelines for containerized applications using GitHub Actions, Jenkins, and Docker. Independently implemented AWS infrastructure, Kubernetes and serverless deployments using Terraform, EKS, Lambda, and Argo CD, integrating security, observability, and reliability practices.

TECHNICAL SKILLS

Cloud & Networking: AWS (EKS, Lambda, EC2, ECR, VPC, ALB, RDS, S3, WAF, IAM, CloudWatch), subnets, NAT, routing, security groups

Infrastructure & Automation: Terraform, Ansible, Linux, Bash

Containers, CI/CD & GitOps: Docker, Docker Compose, Kubernetes, Helm, Jenkins, GitHub Actions, Argo CD, Git, GHCR, Docker Hub

Security & Identity: IRSA, GitHub OIDC, AWS Secrets Manager, External Secrets Operator, Trivy, SonarQube, Gitleaks

Observability: OpenTelemetry, Prometheus, Amazon Managed Service for Prometheus, Grafana, Loki, Tempo

Development & Testing: Python, FastAPI, React, TypeScript, PostgreSQL, SQLAlchemy, Alembic, pytest, k6

PROJECTS

AssembleMonitor - Smart Construction Site Management System | GitHub

Application developed during the Noorisys internship; AWS/DevOps implementation completed independently afterward.

- Provisioned AWS VPC networking, NAT, ALB/WAF, EKS, RDS PostgreSQL and S3 with Terraform; validated network modules using five mocked-provider tests.
- Built Jenkins CI/CD with SonarQube quality gates, Trivy image checks and manual approval; used Helm image updates and Argo CD to reconcile releases onto EKS.
- Configured non-root containers, health probes, IRSA, AWS Secrets Manager, External Secrets Operator, HPA and PodDisruptionBudget for Kubernetes workloads.
- Integrated OpenTelemetry metrics, logs and traces with Prometheus/AMP, Grafana, Loki and Tempo; automated Node Exporter setup on three hosts using Ansible.
- Ran a project load test at 30 virtual users (2,304 requests; 0% failures; 1.12 s p95) and performed controlled database, API and DNS failure drills.

CallMissed AI Workspace | GitHub

Independent AWS deployment and DevOps automation for a React/TypeScript and FastAPI AI workspace.

- Built a multi-stage, non-root Docker image and deployed the application on AWS Lambda through ECR and a Lambda Function URL.
- Provisioned Lambda, ECR, IAM, Secrets Manager, CloudWatch and S3-backed Terraform state, keeping runtime secrets separate from infrastructure code.
- Built GitHub Actions CI/CD with Ruff, 19 pytest tests, frontend validation, Trivy scans, Docker smoke tests and Terraform checks; used OIDC, image-digest deployment, health verification and previous-image rollback.
- Added signed voice-session ownership, request throttling, a paid-request kill switch and a 180-second voice cap; documented deployment and teardown procedures.

PROFESSIONAL EXPERIENCE

DevOps Intern | Elevate Labs | Remote Oct 2026 - Present

- Built GitHub Actions CI/CD for RenewGrid, publishing versioned frontend/backend images to GHCR and verifying a four-service Docker Compose deployment on temporary runners.
- Configured a 10-stage Jenkins pipeline on Ubuntu AWS EC2; verified 26 backend tests, frontend build/lint, Trivy security gate, two CycloneDX SBOMs, Docker Hub publication and deployment checks.
- Investigated an initial Trivy report of 54 HIGH/CRITICAL findings, updated dependencies and confirmed a later Jenkins build passed its configured security gate.
- Used Terraform with the Docker provider to provision, verify and destroy the four-service Compose application locally; recorded a no-change follow-up plan and three passing pull-request checks.
- Used pull-request integration, required checks and branch protection for the RenewGrid IaC repository; created an annotated v0.1.0 release tag.

Evidence: GitHub Actions | Jenkins | Terraform

Software Developer Intern | Noorisys Technologies Pvt. Ltd. | Malegaon, India Feb - May 2026

- Developed AssembleMonitor using React/Vite, FastAPI and PostgreSQL for project, materials, attendance, expense and site-photo workflows.
- Implemented SQLAlchemy/Alembic database operations, JWT authentication and role-based access for four user roles; documented application endpoints with Swagger/OpenAPI.

Cloud Support Intern | CanveX | Remote Jan 2025 - Mar 2025

- Supported website, file and database migrations through hosting dashboards, with backups before changes and content checks after transfer.
- Monitored hosting and cloud-storage tasks, investigated synchronization and website issues, and coordinated fixes with a remote support team.

EDUCATION

Master of Computer Applications (MCA) **2024 - 2026**
Savitribai Phule Pune University (SPPU)

Bachelor of Science in Computer Science (B.Sc. CS) **2021 - 2024**
Savitribai Phule Pune University (SPPU)

CERTIFICATIONS & TRAINING

Oracle Cloud Infrastructure 2025 Certified Foundations Associate | Oracle
Ethical Hacking | NPTEL, IIT Kharagpur
Web Technology | SWAYAM, Uttarakhand Open University
AWS Cloud Practitioner (CLF-C02) Exam Preparation | Udemy
AWS Solutions Architecture Job Simulation | AWS via Forage
